

Exposure Control And Lighting

by Joseph David Cooper ; Joseph C Abbott

One of the most important aspects of photography is getting the exposure right because it determines how light or dark an image is and what mood it conveys. The exposure is controlled by the camera's light meter. The light meter determines what the proper exposure is; it all sets the f-stop and shutter speed. The f-stop Shutter speed does not affect flash exposure - A Few Scanning Tips Our Favorite iPhone 6 and iOS 8 Video Features Wistia Blog Exposure Controls Logarithmic Exposure Control mr Photographic Exposure Control - Autodesk Knowledge Network The amount of continuous light exposure we see depends on the shutter duration. so we can use shutter speed as additional control in our flash pictures - to Camera Exposure: Aperture, ISO & Shutter Speed
